This multi-cache is part of the Great White North Geotour.

This multi-cache is a quick walking tour of downtown Charlottetown, Prince Edward Island.

The assembly of the waypoints will lead you to the final cache location, which is just outside of town, along the Confederation Trail. The cache contains a large log book and pencil, some good "swag", and an unactivated TB in an envelope for the FTF. **It is important that you hide this cache as you found it or better.** If you are on bike, you can make this as a bike tour along.

This cache is based on GCKC9G, which provides a great walking tour of the Halifax boardwalk. And also from GCPAHT.

I enjoyed a jaunt around Charlottetown with Tanglebones in quest of the answers for this cache. Thanks so much for the mini-tour - it has whetted my appetite and I hope to be back on this island someday in a warmer season. [:)]

Fourth of seven caches found in the company of Garmin Gal, on the occasion of our first geo-vacation together. This was a beautiful stroll around your lovely capital on a brisk November day. Very nice, thank you. This is our second Great White North Geotour cache, and we are both determined to get through to the end as soon as we can.

PS - Dipped two TB's so they can record PEI visits.

Out for a bit of Thanksgiving caching. This one was MUCH easier to find in daylight, rather than at sunset. TNLN
