Cache Details

Small caching tour of Winnipeg in the St. Boniface district. This area is rich with history. You could spend weeks here just reading the memorials.

The Cache is not necessarily winter friendly. But it is also not winter un-friendly either. Some digging will be required at the final, but the hiding spot, and the cache, are large enough that you should be able to find it.

This cache, placed as part of the

GREAT WHITE NORTH GEOTOUR

Look for the 3-digit number under the cache cover

This was a fun expedition that I was able to complete over two noon hours. TFTC TNLNSL

September 27 by Kabuthunk

Methinks CJBWielgosz was thinking this cache was a 'traditional' style. You only want some information from the monument... the cache is elsewhere. An elsewhere that I was able to locate as my fifth and final cache of the day [:D]. Bit of an adventure this thing put me on, to boot... it more ways than you think.

I had actually gotten the info from location 1 a few months ago, however didn't have the opportunity (or just got lazy [:P]) to go after the others. Today however, I was in the process of clearing out a massive pile (aka: 5... but that's about 1/3rd) of caches from my Dani-Radius. This multi has been dwelling inside that Radius for too long now [:P]. I couldn't remember what value I came up with for "A", so I ended up re-visiting location 1 again anyway. Several people were in the park, but they paid me no attention, since I walked in and out quickly. Dropping the remaining four locations into my GPS as waypoints, and I was on my way! To the second park!

I actually also got another find at the second park while obtaining the values for "B", "C", and "D". Can't go wrong with a bonus cache [:D]. But after paying for parking (*shakes fist at his now-empty change slot in the car*) and snagging the three values, I noticed that the fifth value ways way off. Hence... I decided to see if I could work without it. Creating a few waypoints for possible answers, I headed off to what seemed the most logical. Telling my GPS to navigate me to there by following the road... it told me to loop around and go over the bridge down Main.

Seemed a bit odd, but I figured it knew a shortcut. Continuing down main... continuing... still going... turn on Higgins?!? What the hell? Umm... ok... since there's traffic behind me, and this isn't an area I'd be too fond of stopping in anyway, I continued down Higgins. Zooming out on the GPS, I now realized what it was doing. It saw that the closest 'road' to the coordinates was actually the other side of the river! The GPS just thought that it would be fastest if I parked on the nearest road, and then just... crossed the river. Easy-peasy.

Yeah, screw that! I quickly point at a road vaguely close to the

and the weather is fair, you could complete this on on foot, but using an HPV (Human Powered Vehicle) is ideal. In the winter, TAKE A CAR! THIS IS WINNIPEG!

Location 1 - At Posted Coordinates

The first (posted) set of coordinates will lead you to Coronation Park. This was the site of my first Geocache, which was muggled within 5 hours of my placing it. This is a pleasant little park and one of the oldest in the city. A fun day would be to pick up some Burgers and Fries at Mrs. Mikes down the street and enjoy a picnic here. But for the purposes of this cache you are looking at the monument. Not the big one...the small one. What is the second number in the Legion # that this memorial is dedicated to. This number is "A"

Location 2 - 49 53.211 - 97 07.395

We are looking for the year Tache arrived here. Add the first to the fourth number of that year to get "B"

Location 3 - 49 53.170 - 97 07.383

How many "adult" bison are on this monument. Subtract 3 from this number to get "C".

Location 4 - 49 53.130 - 097 07.387

Marvel at how many days the nuns spent in a canoe on their way here. Subtract this number from 60 to get "D".

Log Notes

Snagging the travelbug to migrate it along, I headed out. I was hoping to be able to make one or two more finds, but ran out of the for the day. Thanks for the fifth and last cache of the day! A fun cache to end a gorgeous day for wandering around parks [:)]. I however COMPLETELY forgot to obtain the three-digit number under the lid for the massive final cache in Ottawa. However, the odds of me actually finding the rest, or even going to Ottawa anytime in the vaguely, remotely, within-the-next-10-years is ridiculously slim to nil. Unless of course I get a massive raise and can retire at the age of 40 or something [:P].

Took: "Dunny! Me! I'm French!" travelbug

September 3 by CJBWielgosz
We looked and looked but could not find it. We were reluctant to dig too close to the War monuments so we just left it as is. Maybe we will try again a different day as it is close to home.

September 1 by a j
Found first 5 stages last week. Picked up cache today. TFTH SL

September 1 by Wpgbear
Out caching with AJ. Quick find. TFTH!

To find the final number, count all of the bolts in this structure...just kidding! Look up. Count the number of 2x4's that make up the flat **bottom** of the slide (not the sides). That number is "E".

Here is the coordinate cipher. Just plug in your numbers and go get it!

N 49 5A.[A+B][A+B]B - W097 0E.CDC

June 29 by M3J

One of the last few in the series for us and the first of our trip out west. We really enjoyed this one, despite my math error (twice!) causing us to take far longer on the final than needed.

TFTC!

June 29 by gerfma

Nice multi with a great tour of St. Boniface. TFTC
